AVAILABILITY ANALYSIS

(Section 46a-68-84)
March 2021

INTRODUCTORY NOTES

This section was in compliance and did not contain any proposals or recommendations.

During this *Plan* year, the Office of Human Resources (OHR) developed a new classification system for professional titles covered by the University of Connecticut Employees Association (UCPEA) bargaining unit. The new system, Career Paths, was implemented in July 2020.

The Career Paths system is comprised of 179 job titles in nine levels. Career Paths uses general descriptors to categorize work by (1) Occupation and by (2) Level. Occupational Groups are broad categories of associated or related occupations. Each Occupational Group consists of Job Families, Job Paths, Job Titles, Job Categories, and Job Levels. For *Affirmative Action Plan* analyses, job titles have been grouped into twenty-one new categories based on job families which group related jobs with similar work, requiring like training, skills, knowledge, and experience.

Six categories in the professional EEO category remain the same: Academic Assistants, Specialists, University Staff Professional 2, University Staff Professional 3, University Professional All Other and Remaining Professional. All job group categories in the professional EEO category are now organized in alphabetical order by name of category. All new categories are labeled "New Category" in red at the top of each sheet.

Additionally, a new category in the Protective Services EEO category was created for the Firefighter title. For this Plan year, the title is held by 23 employees and is expected to increase in the future. With this change, Protective Services Fire is comprised of titles with promotional opportunity above the firefighter level and Protective Services Firefighter, with entry level hires. This reporting structure mirrors the categories for the Police.

In the EEO 6 Qualified Craft category, the QCW (HVACR) title reached 25 employees at the end of the Plan year. Due to potential reorganization in the upcoming year due to pandemic needs and reassessments, this title may fluctuate. A separate analysis will be conducted in the next Plan year if the title remains at 25.

In the Professional Professor category, the Distinguished Professor title is separated from the Professor title. The Distinguished Professor is the highest honor that the University bestows on a faculty member who has demonstrated excellence in teaching, research, and outreach/service. It is purely an honorary title bestowed on existing faculty and does not reflect additions to the workforce or promotional advancement.

Subsection (a)

Availability analyses were conducted by occupational category for each labor market area. The job content of each office, position, and position classification within an occupational category or, where appropriate, the job content of a position classification was examined and matched with the most nearly parallel job title from the data sources utilized and a relevant labor market was identified.

For the executive-managerial and faculty categories, the recruitment areas are national and statewide. Academic Assistants, Specialists, and University Staff Professionals (2,3 and Other Titles), in the professional non-faculty category, also used national and statewide data. Statewide data was used for all other professional non-faculty categories and for the Protective Services categories at all campuses. Local labor markets were used for secretarial-clerical, technical-paraprofessional, qualified craft workers and service maintenance categories. For the regional campuses, the local labor market areas in which each regional campus is geographically located were utilized.

Subsection (b)

The following data elements were considered in calculating availability for each category:

- employment figures
- unemployment figures
- the racial and sexual composition of the persons in promotable and/or transferable offices, positions and position classifications

Faculty

In the faculty job categories, promotions are based on the requirements of the Promotions, Tenure, and Reappointment (PTR) procedures that are included as **Exhibit 2** of the *Organizational Analysis* section. For promotion and award of tenure, an Assistant Professor typically follows a six-year track from time of hire. To determine the promotional pool for the Associate Professor, all Assistant Professors with a hire date of six years ago and earlier were considered eligible for promotion. Please see **Exhibit 1** of this section for an explanation of the tenure schedule and the chart by hire date of all Assistant Professors with race/gender.

Once awarded tenure and promotion to Associate Professor, faculty are eligible for promotion to Professor according to the Promotions, Tenure, and Reappointment (PTR) procedures. Associate Professors may apply for promotion to Professor at any time. Promotion to Professor is not a requirement and does not follow a tenure schedule as the Assistant Professor to Associate Professor promotion.

Professional Staff

For the analyses of coaches and trainers in the Division of Athletics titles of Specialist, Division 1 data of the NCAA demographic reports continued to be used as the sole statistical source. Statistical data used corresponds to the sports that are represented at the University.

In addition, applicable sections of the University of Connecticut Professional Employee Association (UCPEA) contract are included to explain the rights that employees have to apply for all positions for which they are qualified and to support the promotional pools used for calculating availability. Please see **Exhibit 2** of this section for the contract language.

As discussed in previous technical assistance meetings, unemployment data is not required as a statistical souces if the data is not applicable to the analyzed title/category. When unemployment data was not used, the inapplicability is noted.

Subsection (c)

In calculating availability, the following data elements were considered:

- *The U. S. Department of Education National Center for Educational Statistics (IPEDS), 2018* for Executive/Management, Faculty and several Professional job categories. Please see **Exhibit 3** of this section.

- *NCAA Race and Gender Demographics Report* for the Specialist titles, which encompass coaches and trainers in the Department of Athletics. As agreed to in the August 18, 2016 Technical Assistance meeting, only Division 1 data is used and the "Other Minority" category is not included in the "AAIANHNPI Male" or "AAIANHNPI Female" race/gender categories. Based in previous technical assistance meetings, the data in the "2 or More Races" category, as defined by the Federal Government, continues to not be included because the State of Connecticut has not yet addressed, or included, this category in its regulations. The University has compiled an Excel spreadsheet to show NCAA data corresponding only to sports represented at the University. The Excel spreadsheet and the applicable sections of the actual *NCAA Race and Gender Demographics Report* are contained in **Exhibit 4** of this section.

Subsection (d)

For each occupational category, position classification or job title analyzed, the name of each source consulted and the basis for selection of each source is provided. The sources utilized include:

- The U. S. Department of Education National Center for Educational Statistics (IPEDS), 2018 Tables 314.40, 315.20, 323.40, 323.50, 324.30, 324.35, 324.60, 324.70. **Exhibit 3** of this section.
- NCAA Race and Gender Demographics Report, 2019 – **Exhibit 4** of this section.
- Connecticut Occupational Statistics for Equal Employment Opportunity & Affirmative Action Planning 2000, Volume 1 Western Connecticut and Volume 2 Eastern Connecticut – **Exhibit 5** of this section
- Connecticut Department of Labor's Connecticut Labor Force Data for Affirmative Action, Third Quarter 2020 – **Exhibit 6** of this section.

Additionally, where job titles in the source consulted are not identical to the job titles employed by the agency, the job titles deemed most similar to office, position and position classification within an occupational category or, where appropriate, position classification or job title are documented, and the manner in which the availability base is calculated is substantiated.

Subsection (e)

For job titles with twenty-five (25) or more employees in occupational categories where only the entry-level positions are filled by hiring and the other job titles in the series are filled by promotion, the availability base is calculated for the entire series and goals are set for the entire series.

Subsection (f)

In calculating the availability base, the sources used to fill position are determined and assigned weights based on the percentage of positions filled from those sources. The total weight for all sources does not exceed one hundred percent (100%). The percent of each race and sex group from each relevant source is multiplied by the weight given to the corresponding source resulting in a weighted factor. The weighted factors for each race and sex group are added to determine the availability base for each race and sex group in each occupational category, position classification, or job title analyzed.

Subsection (g)

The manner in which the availability base is calculated is substantiated in the *Plan*.

INTRODUCTION

The Connecticut Occupational Statistics provides occupational data from the Bureau of the Census Equal Employment Opportunity (EEO) Special Tabulation from the 2000 Census. Data is presented for 471 occupations according to the gender and race or Hispanic Origin of those persons in the civilian labor force. This data is also available on the Connecticut Department of Labor's website at: www.ctdol.state.ct.us/lmi.

Although the report will have many uses both now and in the future, the primary use will be for affirmative action planning for both public and private sectors. The Commission on Human Rights and Opportunities (CHRO) has the responsibility for making EEO data available to State agencies for the purpose of affirmative action planning as required under the provisions of State law. The Department of Labor has the responsibility for making EEO data available to all private sector employers who have contracts with the federal, state, local, or quasi-governmental entities for the purpose of affirmative action planning as required under Federal law. With few exceptions, all organizations that receive Federal or State funds must prepare an Affirmative Action Plan. The data in this document will provide most of the base data necessary to complete such plans.

This report consists of two volumes, each covering a certain geographic portion of the state (see Geographic Coverage). The geographic data used from the 2000 Special EEO Tabulation consists of data for the State of Connecticut, the eight counties, Primary Metropolitan Statistical Areas and Metropolitan Statistical Areas within Connecticut.

GEOGRAPHIC COVERAGE

The 2000 Special EEO Tabulation which was the source for this report has data available for the State of Connecticut, its eight counties, Primary Metropolitan Statistical Areas (PMSA's) and Metropolitan Statistical Areas (MSA's).

There are 16 different geographical areas within Connecticut for which EEO data is available. The Connecticut Occupational Statistics presents this data in two volumes that cover the following sections of the state:

Volume 1 - Western Connecticut
Volume 2 - Eastern Connecticut

Each volume contains a statewide summary and data for the covered counties, PMSA's, and MSA's in that section of Connecticut.

The specific areas covered in each volume are as follows:

Volume 1	*Volume 2*
State of Connecticut	State of Connecticut
Fairfield County	Hartford County
Litchfield County	Middlesex County
New Haven County	New London County
Bridgeport MSA	Tolland County
Danbury MSA	Windham County
New Haven/Meriden MSA	Hartford MSA
Stamford/Norwalk MSA	New London/Norwich CT-RI MSA
Waterbury MSA

APPENDIX A

OCCUPATIONAL SYSTEM

Occupational Data & Occupational Groups - Census 2000 Special EEO Tabulation

The Census 2000 Special EEO Tabulation occupational groupings began with 509 unique categories from the Standard Occupational Classification - O*NET-SOC system. These data were adjusted as follows: (a) 35 categories with fewer than 10,000 employed nationwide were aggregated into larger categories, so that all occupational categories shown on the EEO File will be greater than 10,000; (b) four military specific occupations were excluded; and (c) one category was added for the unemployed with no work experience since 1995. When the unemployed with no work experience since 1995 (Census Code 992) are added to the 471 occupational categories, there are 472 occupational categories.

A list of codes and titles are presented below for the 14 EEO Occupational Groups for the 2000 Special EEO Tabulation.

EEO Occupational Groups and Titles for the Census 2000 Special EEO Tabulation

EEO Occupational Codes	EEO Occupational Group Titles for the Special EEO Tabulation
1	Management, Business and Financial Workers
2	Science, Engineering and Computer Professionals
3	Healthcare Practitioner Professionals
4	Other Professional Workers
5	Technicians
6	Sales Workers
7	Administrative Support Workers
8	Construction and Extractive Craft Workers
9	Installation, Maintenance and Repair Craft Workers
10	Production Operative Workers
11	Transportation and Material Moving Operative Workers
12	Laborers and Helpers
13	Protective Service Workers
14	Service Workers, except Protective

APPENDIX B

RACE / NATIONAL ORIGIN

The racial categories in this publication will be:

White Non-Hispanic
Black Non-Hispanic
Hispanic In Any Race
Other Races

Other Races include:

American Indian/Alaskan Native (AIAN) Non-Hispanic
Asian Non-Hispanic
Native Hawaiian/Other Pacific Islander (NHOPI), Non-Hispanic
AIAN and White Non-Hispanic
AIAN and Black Non-Hispanic
Asian and White Non-Hispanic
Balance 2+ Races, Non-Hispanic

The concept of race as used by the Census Bureau reflects self-identification; it does not denote any clear-cut scientific definition of biological stock. The data for race represent self-classification by people according to the race with which they most closely identify. Furthermore, it is recognized that the categories of the race item include both racial and national origin or socio-cultural groups. Origin can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. Persons of Hispanic origin may be of any race. The categories are defined below.

WHITE - A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as “White” or report entries such as Irish, German, Portuguese, Italian, Lebanese, Near Easterner, Arab, or Polish.
The category is defined by the White Non-Hispanic category, i.e., from the above-presented Race and Ethnicity for Other than Hawaii specifications; this is White, Non-Hispanic.

BLACK - A person having origins in any of the Black racial groups of Africa. It includes people who indicate their race as “Black, African Am., or Negro,” or provide written entries such as African American, Afro-American, Kenyan, Nigerian, or Haitian. Combining the Black, Non-Hispanic category with the Black and White Non-Hispanic category, i.e. creates the category, combine Black, Non-Hispanic with Black and White Non-Hispanic.

HISPANIC - The category is created by combining all Hispanics, as was done in previous versions of the EEO File, i.e., from the above-mentioned specifications, add White, Hispanic; Black, Hispanic; and Other Hispanic.

OTHER - The category is created from the remaining categories, i.e. Balance 2+ Races, from the specifications for Race and Ethnicity for:

American Indian or Alaska Native -

American Indian: This category includes people who indicated their race as "American Indian," entered the name of an Indian tribe, or reported such entries as Canadian Indian, French American Indian, or Spanish American Indian.

Alaska Native. This category includes written responses of Eskimos, Aleuts, and Alaska Indians as well as entries such as Arctic Slope, Inupiat, Upik, Alutiiq, Egegik, and Bribilovian. The Alaska tribes are the Alaskan Athabascan, Tlingit, and Haida. The information for Census 2000 is based on the American Indian Tribal Classification List for the 1990 census, which was expanded to list the individual Alaska Native Villages when provided as a written response for race.

The AIAN category is created by combining the American Indian or Alaska Native, Non-Hispanic category with the American Indian or Alaska Native and White, Non-Hispanic category, i.e., from above-cited specifications, add American Indian or Alaska Native Non-Hispanic to American Indian or Alaska Native and White Non-Hispanic.

Asian - A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. It includes "Asian Indian," "Chinese," "Filipino," "Korean," "Japanese," "Vietnamese," and "Other Asian."

The Asian category is created by combining the Asian, Non-Hispanic category with the Asian and White, Non-Hispanic category, i.e., from the Race and Ethnicity for Other than Hawaii specifications, add Asian, Non-Hispanic to Asian and White, Non-Hispanic.

Native Hawaiian or Other Pacific Islander - A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. It includes people who indicate their race as "Native Hawaiian," "Guamanian or Chamorro," "Samoan," and "Other Pacific Islander."

The NHOPI category is defined by the Native Hawaiian or Other Pacific Islander, Non-Hispanic category, i.e., from the Race and Ethnicity for Other than Hawaii specifications, this is Native Hawaiian or Other Pacific Islander Non-Hispanic. Other than Hawaii, combine American Indian or Alaska Native and Black, Non-Hispanic.

Balance 2+ Races - Balance of individuals reporting more than one race Non-Hispanic plus individuals reporting some other race, Non-Hispanic.

People may have chosen to provide two or more races either by checking two or more race response check boxes, by providing multiple write-in responses or by some combination of check boxes and write-in responses. The race response categories shown on the questionnaire are collapsed into the five minimum races identified by the OMB, and the Census Bureau “Some other race” category. For data product purposes, “Two or more races” or "Balance 2+ Races" refers to combinations of two or more of the following race categories:

1. White
2. Black or African American
3. American Indian and Alaska Native
4. Asian
5. Native Hawaiian and Other Pacific Islander
6. Some other race

There are 57 possible combinations involving the race categories shown above. Thus, according to this approach, a response of “White” and “Asian” was tallied as two or more races, while a response of “Japanese” and “Chinese” was not because “Japanese” and “Chinese” are both Asian responses. When this data presentation is used, the individual race categories will add to more than the total population because people may be included in more than one category. In this publication, these are displayed as **OTHER**.

Comparability

The data on race in Census 2000 are not directly comparable to those collected in previous censuses. The October 1997 revised standards issued by the OMB led to changes in the question on race for Census 2000. The Census 2000 Dress Rehearsal data were the first to reflect these changes. First, respondents were allowed to select more than one category for race. Secondly, the sequence of the questions on race and Hispanic origin changed. Third, there were terminology changes to the response categories, such as spelling out “American” instead of “Amer.” For the American Indian or Alaska Native category, and adding “Native” to the Hawaiian response category. The 1990 category, “Other race,” was renamed “Some other race.” Other differences that may affect comparability involve the individual categories on the Census 2000 questionnaire. The 1990 category, “Asian and Pacific Islander,” was separated into two categories, “Asian” and “Native Hawaiian and Other Pacific Islander” for Census 2000.

Accordingly, on the Census 2000 questionnaire, there were seven Asian categories and four Native Hawaiian and Other Pacific Islander categories. The two residual categories, “Other Asian” and “Other Pacific Islander,” replaced the 1990 single

category “Other API.” The 1990 categories, “American Indian,” “Eskimo,” and “Aleut,” were combined into “American Indian and Alaska Native.” American Indians and Alaska Natives can report one or more tribes.

Hispanic Or Latino

The data on the Hispanic or Latino population, which was asked of all people, were derived from answers to long-form questionnaire Item 5, and short-form questionnaire Item 7. The terms “Spanish,” “Hispanic origin,” and “Latino” are used interchangeably. Some respondents identify with all three terms, while others may identify with only one of these three specific terms. Hispanics or Latinos who identify with the terms “Spanish,” “Hispanic,” or “Latino” are those who classify themselves in one of the specific Hispanic or Latino categories listed on the questionnaire – “Mexican,” “Puerto Rican,” or “Cuban” – as well as those who indicate that they are “other Spanish, Hispanic, or Latino.”

Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

Some tabulations are shown by the origin of the householder. In all cases where the origin of households, families, or occupied housing units is classified as Spanish, Hispanic, or Latino, the origin of the householder is used.

If an individual could not provide a Hispanic origin response, their origin was assigned using specific rules of precedence of household relationship. For example, if origin was missing for a natural-born daughter in the household, then either the origin of the householder, another natural-born child, or the spouse of the householder was assigned. If Hispanic origin was not reported for anyone in the household, the origin of a householder in a previously processed household with the same race was assigned. As opposed to the procedure used in 1990, in Census 2000 race and Spanish surnames were used to assist in assigning an origin.

Comparability - Hispanic Origin

There are two important changes to the Hispanic origin question for Census 2000. First, the sequence of the race and Hispanic origin questions for Census 2000 differs from that in 1990; in 1990, the race question preceded the Hispanic origin question. Testing before Census 2000 indicated that response to the Hispanic origin question could be improved by placing it before the race question without affecting the response to the race question. Second, there is an instruction preceding the Hispanic origin question indicating that respondents should answer both the Hispanic origin and the race questions. This instruction was added to give emphasis to the distinct concepts of the Hispanic origin and race questions and to emphasize the need for both pieces of information.

In 1990, the Hispanic origin question and the race question had separate edits; therefore, although information may have been present on the questionnaire, it was not fully utilized due to the discrete nature of the edits. However, for Census 2000, there was a joint race and Hispanic origin edit which for example, made use of race responses in the Hispanic origin question to impute a race if none was given.

APPENDIX C

AGE and GENDER

AGE

The data on age, which was asked of all people, were derived from answers to the long-form questionnaire Item 4 and short-form questionnaire Item 6. The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information. Their reported age was used only when date of birth information was unavailable.

Data on age are used to determine the applicability of some of the sample questions for a person and to classify other characteristics in census tabulations. Age data are needed to interpret most social and economic characteristics used to plan and examine many programs and policies. Therefore, age is tabulated by single years of age and by many different groupings, such as 5-year age groups.

GENDER

The data on gender, which was asked of all people, were derived from answers to long-form questionnaire Item 3 and short-form questionnaire Item 5. Individuals were asked to mark either “male” or “female” to indicate their gender. For most cases in which gender was not reported, it was determined from the person’s given (i.e., first) name and household relationship. Otherwise, gender was imputed according to the relationship to the householder and the age of the person.

APPENDIX D

AREA CLASSIFICATIONS

COUNTY

The primary legal divisions of most states are termed “counties.” Each county and statistically equivalent entity is assigned a three-digit Federal Information Processing Standards code that is unique within each state. These codes are assigned in alphabetical order of county or county equivalent within each state, except for the independent cities, which are assigned codes higher than and following the listing of counties.

METROPOLITAN AREA

The general concept of a metropolitan area (MA) is one of a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some MA's are defined around two or more nuclei. The MA's and the central cities within an MA are designated and defined by the Federal Office of Management and Budget, following a set of official standards that are published in a Federal Register Notice. The interagency Federal Executive Committee developed these standards on Metropolitan Areas, with the aim of producing definitions that are as consistent as possible for all MA's nationwide.

Each MA must contain either a place with a minimum population of 50,000 or a U.S. Census Bureau-defined urbanized area and a total MA population of at least 100,000 (75,000 in New England). In New England, MA's consist of groupings of cities and county subdivisions (mostly towns) rather than whole counties.

To meet the needs of various users, the standards provide for a flexible structure of metropolitan definitions that classify each MA either as a Metropolitan Statistical Area (MSA) or as a Consolidated Metropolitan Statistical Area (CMSA) divided into Primary Metropolitan Statistical Areas (PMSA).

CONSOLIDATED AND PRIMARY METROPOLITAN STATISTICAL AREAS (CMSA & PMSA)

If an area that qualifies as a Metropolitan Area (MA) has 1 million people or more, two or more PMSA's may be defined within it. Each PMSA consists of a large urbanized county or cluster of counties (cities and towns) that demonstrate very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSA's are established, the larger MA of which they are component parts is designated a CMSA.

METROPOLITAN STATISTICAL AREA (MSA)

Metropolitan Statistical Areas (MSA's) are Metropolitan Areas (MA's) that are not closely associated with other MA's. Non-metropolitan counties (county subdivisions in New England) typically surround MSA's.

APPENDIX E

ROUNDING and CONFIDENTIALITY

ROUNDING

Effects of Required Rounding:

The Census Bureau's internal Disclosure Review Board (DRB) is responsible for reviewing specifications for all census data products, and determining that no product format is approved that contains any degree of disclosure risk. To meet the DRB's disclosure avoidance standards, the Special EEO Tabulation was created using approved rounding rules that are described in the Confidentiality section of this appendix. Basically, all counts in these files are rounded.

Specifically, in the EEO residence and worksite files, each occupational group contains combinations of characteristics that are individually rounded (for example, the gender - race group variables in file # 1, such as White non-Hispanic males) and also a total civilian labor force variable that was constructed based on the unrounded total and was then rounded (named "total" on the files). This approach provides users with occupational group totals that are closer to the actual unrounded estimates. However, the total civilian labor force value may not equal the sum of the individually rounded characteristic variables for each occupational group. (This rounding procedure occurs for each observation in the file; for example, each geographic unit's occupational group.) In addition, the totals for a particular summary level of geography (state) will likely not equal the sum of the geographies within that summary level (counties).

In the EEO worksite/residence (also known as workflow) files, the rounding of the total number of people employed at work occurs for each observation in the file, which is a combination of occupational groups by race and by gender for every place of work by place of residence occurrence. Some totals may not agree between files for the same geographic areas and/or occupational groups, because of rounding of estimates.

Data from the Special EEO Tabulation will not agree with estimates from other Census 2000-based products (such as Summary Files 3 and 4) because of universe difference and rounding. Use published SF-3 and SF-4 data products to obtain estimates of the total civilian labor force, total number of employed, or high-level

occupational groups for the civilian employed population. The Special EEO Tabulation gives users access to more detailed occupational group data.

CONFIDENTIALITY

In preparing to publish data from Census 2000, the Census Bureau became extremely concerned that with the emergence of advanced computer technology that decodes information for areas by combining extremely detailed characteristics such as occupations with small geographic units, the possibility of revealing information on individual respondents would be greatly enhanced.

In 1997 the Office of Management and Budget (OMB) rescinded Statistical Policy Directive Number 15 (1977), covering the publication and use of data covering race and ethnicity. Based on OMB's Revised Standards (1997), the Special EEO Tabulation presents data for 12 race/ethnicity groups instead of six, including several dual-race combinations, such as Black/White and Black/Asian, among others

These expanded race/ethnicity distinctions, combined with the increased ability to electronically match different data files, prompted the Census Bureau's Disclosure Review Board (DRB) to issue two rules in 2000 affecting the Census 2000 Special EEO Tabulation.

1. Any occupational category containing fewer than 10,000 people employed nationwide cannot be shown separately, and must be combined with related occupational categories to create aggregates containing 10,000 or more people.
2. Detailed occupational categories, when cross-tabulated by the 14 race/ethnicity categories, cannot be shown for any geographic area containing fewer than 50,000 people. Geographic areas containing fewer than 50,000 people must be combined in such a way that the resulting aggregation:
    a. Contains 50,000 or more people, **and**
    b. The subtraction of any geographic subset from a larger, combined area does not reveal information for any area containing fewer than 50,000 people.

INTRODUCTION

The Connecticut Occupational Statistics provides occupational data from the Bureau of the Census Equal Employment Opportunity (EEO) Special Tabulation from the 2000 Census. Data is presented for 471 occupations according to the gender and race or Hispanic Origin of those persons in the civilian labor force. This data is also available on the Connecticut Department of Labor's website at: www.ctdol.state.ct.us/lmi.

Although the report will have many uses both now and in the future, the primary use will be for affirmative action planning for both public and private sectors. The Commission on Human Rights and Opportunities (CHRO) has the responsibility for making EEO data available to State agencies for the purpose of affirmative action planning as required under the provisions of State law. The Department of Labor has the responsibility for making EEO data available to all private sector employers who have contracts with the federal, state, local, or quasi-governmental entities for the purpose of affirmative action planning as required under Federal law. With few exceptions, all organizations that receive Federal or State funds must prepare an Affirmative Action Plan. The data in this document will provide most of the base data necessary to complete such plans.

This report consists of two volumes, each covering a certain geographic portion of the state (see Geographic Coverage). The geographic data used from the 2000 Special EEO Tabulation consists of data for the State of Connecticut, the eight counties, Primary Metropolitan Statistical Areas and Metropolitan Statistical Areas within Connecticut.

GEOGRAPHIC COVERAGE

The 2000 Special EEO Tabulation which was the source for this report has data available for the State of Connecticut, its eight counties, Primary Metropolitan Statistical Areas (PMSA's) and Metropolitan Statistical Areas (MSA's).

There are 16 different geographical areas within Connecticut for which EEO data is available. The Connecticut Occupational Statistics presents this data in two volumes that cover the following sections of the state:

Volume 1 - Western Connecticut
Volume 2 - Eastern Connecticut

Each volume contains a statewide summary and data for the covered counties, PMSA's, and MSA's in that section of Connecticut.

The specific areas covered in each volume are as follows:

Volume 1	*Volume 2*
State of Connecticut	State of Connecticut
Fairfield County	Hartford County
Litchfield County	Middlesex County
New Haven County	New London County
Bridgeport MSA	Tolland County
Danbury MSA	Windham County
New Haven/Meriden MSA	Hartford MSA
Stamford/Norwalk MSA	New London/Norwich CT-RI MSA
Waterbury MSA

APPENDIX A

OCCUPATIONAL SYSTEM

Occupational Data & Occupational Groups - Census 2000 Special EEO Tabulation

The Census 2000 Special EEO Tabulation occupational groupings began with 509 unique categories from the Standard Occupational Classification - O*NET-SOC system. These data were adjusted as follows: (a) 35 categories with fewer than 10,000 employed nationwide were aggregated into larger categories, so that all occupational categories shown on the EEO File will be greater than 10,000; (b) four military specific occupations were excluded; and (c) one category was added for the unemployed with no work experience since 1995. When the unemployed with no work experience since 1995 (Census Code 992) are added to the 471 occupational categories, there are 472 occupational categories.

A list of codes and titles are presented below for the 14 EEO Occupational Groups for the 2000 Special EEO Tabulation.

EEO Occupational Groups and Titles for the Census 2000 Special EEO Tabulation

EEO Occupational Codes	EEO Occupational Group Titles for the Special EEO Tabulation
1	Management, Business and Financial Workers
2	Science, Engineering and Computer Professionals
3	Healthcare Practitioner Professionals
4	Other Professional Workers
5	Technicians
6	Sales Workers
7	Administrative Support Workers
8	Construction and Extractive Craft Workers
9	Installation, Maintenance and Repair Craft Workers
10	Production Operative Workers
11	Transportation and Material Moving Operative Workers
12	Laborers and Helpers
13	Protective Service Workers
14	Service Workers, except Protective

APPENDIX B

RACE / NATIONAL ORIGIN

The racial categories in this publication will be:

White Non-Hispanic
Black Non-Hispanic
Hispanic In Any Race
Other Races

Other Races include:

American Indian/Alaskan Native (AIAN) Non-Hispanic
Asian Non-Hispanic
Native Hawaiian/Other Pacific Islander (NHOPI), Non-Hispanic
AIAN and White Non-Hispanic
AIAN and Black Non-Hispanic
Asian and White Non-Hispanic
Balance 2+ Races, Non-Hispanic

The concept of race as used by the Census Bureau reflects self-identification; it does not denote any clear-cut scientific definition of biological stock. The data for race represent self-classification by people according to the race with which they most closely identify. Furthermore, it is recognized that the categories of the race item include both racial and national origin or socio-cultural groups. Origin can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. Persons of Hispanic origin may be of any race. The categories are defined below.

WHITE - A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as “White” or report entries such as Irish, German, Portuguese, Italian, Lebanese, Near Easterner, Arab, or Polish.
The category is defined by the White Non-Hispanic category, i.e., from the above-presented Race and Ethnicity for Other than Hawaii specifications; this is White, Non-Hispanic.

BLACK - A person having origins in any of the Black racial groups of Africa. It includes people who indicate their race as “Black, African Am., or Negro,” or provide written entries such as African American, Afro-American, Kenyan, Nigerian, or Haitian. Combining the Black, Non-Hispanic category with the Black and White Non-Hispanic category, i.e. creates the category, combine Black, Non-Hispanic with Black and White Non-Hispanic.

HISPANIC - The category is created by combining all Hispanics, as was done in previous versions of the EEO File, i.e., from the above-mentioned specifications, add White, Hispanic; Black, Hispanic; and Other Hispanic.

OTHER - The category is created from the remaining categories, i.e. Balance 2+ Races, from the specifications for Race and Ethnicity for:

American Indian or Alaska Native -

American Indian: This category includes people who indicated their race as "American Indian," entered the name of an Indian tribe, or reported such entries as Canadian Indian, French American Indian, or Spanish American Indian.

Alaska Native. This category includes written responses of Eskimos, Aleuts, and Alaska Indians as well as entries such as Arctic Slope, Inupiat, Upik, Alutiiq, Egegik, and Bribilovian. The Alaska tribes are the Alaskan Athabascan, Tlingit, and Haida. The information for Census 2000 is based on the American Indian Tribal Classification List for the 1990 census, which was expanded to list the individual Alaska Native Villages when provided as a written response for race.

The AIAN category is created by combining the American Indian or Alaska Native, Non-Hispanic category with the American Indian or Alaska Native and White, Non-Hispanic category, i.e., from above-cited specifications, add American Indian or Alaska Native Non-Hispanic to American Indian or Alaska Native and White Non-Hispanic.

Asian - A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. It includes "Asian Indian," "Chinese," "Filipino," "Korean," "Japanese," "Vietnamese," and "Other Asian."

The Asian category is created by combining the Asian, Non-Hispanic category with the Asian and White, Non-Hispanic category, i.e., from the Race and Ethnicity for Other than Hawaii specifications, add Asian, Non-Hispanic to Asian and White, Non-Hispanic.

Native Hawaiian or Other Pacific Islander - A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. It includes people who indicate their race as "Native Hawaiian," "Guamanian or Chamorro," "Samoan," and "Other Pacific Islander."

The NHOPI category is defined by the Native Hawaiian or Other Pacific Islander, Non-Hispanic category, i.e., from the Race and Ethnicity for Other than Hawaii specifications, this is Native Hawaiian or Other Pacific Islander Non-Hispanic. Other than Hawaii, combine American Indian or Alaska Native and Black, Non-Hispanic.

Balance 2+ Races - Balance of individuals reporting more than one race Non-Hispanic plus individuals reporting some other race, Non-Hispanic.

People may have chosen to provide two or more races either by checking two or more race response check boxes, by providing multiple write-in responses or by some combination of check boxes and write-in responses. The race response categories shown on the questionnaire are collapsed into the five minimum races identified by the OMB, and the Census Bureau “Some other race” category. For data product purposes, “Two or more races” or "Balance 2+ Races" refers to combinations of two or more of the following race categories:

1. White
2. Black or African American
3. American Indian and Alaska Native
4. Asian
5. Native Hawaiian and Other Pacific Islander
6. Some other race

There are 57 possible combinations involving the race categories shown above. Thus, according to this approach, a response of “White” and “Asian” was tallied as two or more races, while a response of “Japanese” and “Chinese” was not because “Japanese” and “Chinese” are both Asian responses. When this data presentation is used, the individual race categories will add to more than the total population because people may be included in more than one category. In this publication, these are displayed as **OTHER**.

Comparability

The data on race in Census 2000 are not directly comparable to those collected in previous censuses. The October 1997 revised standards issued by the OMB led to changes in the question on race for Census 2000. The Census 2000 Dress Rehearsal data were the first to reflect these changes. First, respondents were allowed to select more than one category for race. Secondly, the sequence of the questions on race and Hispanic origin changed. Third, there were terminology changes to the response categories, such as spelling out “American” instead of “Amer.” For the American Indian or Alaska Native category, and adding “Native” to the Hawaiian response category. The 1990 category, “Other race,” was renamed “Some other race.” Other differences that may affect comparability involve the individual categories on the Census 2000 questionnaire. The 1990 category, “Asian and Pacific Islander,” was separated into two categories, “Asian” and “Native Hawaiian and Other Pacific Islander” for Census 2000.

Accordingly, on the Census 2000 questionnaire, there were seven Asian categories and four Native Hawaiian and Other Pacific Islander categories. The two residual categories, “Other Asian” and “Other Pacific Islander,” replaced the 1990 single

category “Other API.” The 1990 categories, “American Indian,” “Eskimo,” and “Aleut,” were combined into “American Indian and Alaska Native.” American Indians and Alaska Natives can report one or more tribes.

Hispanic Or Latino

The data on the Hispanic or Latino population, which was asked of all people, were derived from answers to long-form questionnaire Item 5, and short-form questionnaire Item 7. The terms “Spanish,” “Hispanic origin,” and “Latino” are used interchangeably. Some respondents identify with all three terms, while others may identify with only one of these three specific terms. Hispanics or Latinos who identify with the terms “Spanish,” “Hispanic,” or “Latino” are those who classify themselves in one of the specific Hispanic or Latino categories listed on the questionnaire – “Mexican,” “Puerto Rican,” or “Cuban” – as well as those who indicate that they are “other Spanish, Hispanic, or Latino.”

Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

Some tabulations are shown by the origin of the householder. In all cases where the origin of households, families, or occupied housing units is classified as Spanish, Hispanic, or Latino, the origin of the householder is used.

If an individual could not provide a Hispanic origin response, their origin was assigned using specific rules of precedence of household relationship. For example, if origin was missing for a natural-born daughter in the household, then either the origin of the householder, another natural-born child, or the spouse of the householder was assigned. If Hispanic origin was not reported for anyone in the household, the origin of a householder in a previously processed household with the same race was assigned. As opposed to the procedure used in 1990, in Census 2000 race and Spanish surnames were used to assist in assigning an origin.

Comparability - Hispanic Origin

There are two important changes to the Hispanic origin question for Census 2000. First, the sequence of the race and Hispanic origin questions for Census 2000 differs from that in 1990; in 1990, the race question preceded the Hispanic origin question. Testing before Census 2000 indicated that response to the Hispanic origin question could be improved by placing it before the race question without affecting the response to the race question. Second, there is an instruction preceding the Hispanic origin question indicating that respondents should answer both the Hispanic origin and the race questions. This instruction was added to give emphasis to the distinct concepts of the Hispanic origin and race questions and to emphasize the need for both pieces of information.

In 1990, the Hispanic origin question and the race question had separate edits; therefore, although information may have been present on the questionnaire, it was not fully utilized due to the discrete nature of the edits. However, for Census 2000, there was a joint race and Hispanic origin edit which for example, made use of race responses in the Hispanic origin question to impute a race if none was given.

APPENDIX C

AGE and GENDER

AGE

The data on age, which was asked of all people, were derived from answers to the long-form questionnaire Item 4 and short-form questionnaire Item 6. The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information. Their reported age was used only when date of birth information was unavailable.

Data on age are used to determine the applicability of some of the sample questions for a person and to classify other characteristics in census tabulations. Age data are needed to interpret most social and economic characteristics used to plan and examine many programs and policies. Therefore, age is tabulated by single years of age and by many different groupings, such as 5-year age groups.

GENDER

The data on gender, which was asked of all people, were derived from answers to long-form questionnaire Item 3 and short-form questionnaire Item 5. Individuals were asked to mark either “male” or “female” to indicate their gender. For most cases in which gender was not reported, it was determined from the person’s given (i.e., first) name and household relationship. Otherwise, gender was imputed according to the relationship to the householder and the age of the person.

APPENDIX D

AREA CLASSIFICATIONS

COUNTY

The primary legal divisions of most states are termed “counties.” Each county and statistically equivalent entity is assigned a three-digit Federal Information Processing Standards code that is unique within each state. These codes are assigned in alphabetical order of county or county equivalent within each state, except for the independent cities, which are assigned codes higher than and following the listing of counties.

METROPOLITAN AREA

The general concept of a metropolitan area (MA) is one of a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some MA's are defined around two or more nuclei. The MA's and the central cities within an MA are designated and defined by the Federal Office of Management and Budget, following a set of official standards that are published in a Federal Register Notice. The interagency Federal Executive Committee developed these standards on Metropolitan Areas, with the aim of producing definitions that are as consistent as possible for all MA's nationwide.

Each MA must contain either a place with a minimum population of 50,000 or a U.S. Census Bureau-defined urbanized area and a total MA population of at least 100,000 (75,000 in New England). In New England, MA's consist of groupings of cities and county subdivisions (mostly towns) rather than whole counties.

To meet the needs of various users, the standards provide for a flexible structure of metropolitan definitions that classify each MA either as a Metropolitan Statistical Area (MSA) or as a Consolidated Metropolitan Statistical Area (CMSA) divided into Primary Metropolitan Statistical Areas (PMSA).

CONSOLIDATED AND PRIMARY METROPOLITAN STATISTICAL AREAS (CMSA & PMSA)

If an area that qualifies as a Metropolitan Area (MA) has 1 million people or more, two or more PMSA's may be defined within it. Each PMSA consists of a large urbanized county or cluster of counties (cities and towns) that demonstrate very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSA's are established, the larger MA of which they are component parts is designated a CMSA.

METROPOLITAN STATISTICAL AREA (MSA)

Metropolitan Statistical Areas (MSA's) are Metropolitan Areas (MA's) that are not closely associated with other MA's. Non-metropolitan counties (county subdivisions in New England) typically surround MSA's.

APPENDIX E

ROUNDING and CONFIDENTIALITY

ROUNDING

Effects of Required Rounding:

The Census Bureau's internal Disclosure Review Board (DRB) is responsible for reviewing specifications for all census data products, and determining that no product format is approved that contains any degree of disclosure risk. To meet the DRB's disclosure avoidance standards, the Special EEO Tabulation was created using approved rounding rules that are described in the Confidentiality section of this appendix. Basically, all counts in these files are rounded.

Specifically, in the EEO residence and worksite files, each occupational group contains combinations of characteristics that are individually rounded (for example, the gender - race group variables in file # 1, such as White non-Hispanic males) and also a total civilian labor force variable that was constructed based on the unrounded total and was then rounded (named "total" on the files). This approach provides users with occupational group totals that are closer to the actual unrounded estimates. However, the total civilian labor force value may not equal the sum of the individually rounded characteristic variables for each occupational group. (This rounding procedure occurs for each observation in the file; for example, each geographic unit's occupational group.) In addition, the totals for a particular summary level of geography (state) will likely not equal the sum of the geographies within that summary level (counties).

In the EEO worksite/residence (also known as workflow) files, the rounding of the total number of people employed at work occurs for each observation in the file, which is a combination of occupational groups by race and by gender for every place of work by place of residence occurrence. Some totals may not agree between files for the same geographic areas and/or occupational groups, because of rounding of estimates.

Data from the Special EEO Tabulation will not agree with estimates from other Census 2000-based products (such as Summary Files 3 and 4) because of universe difference and rounding. Use published SF-3 and SF-4 data products to obtain estimates of the total civilian labor force, total number of employed, or high-level

occupational groups for the civilian employed population. The Special EEO Tabulation gives users access to more detailed occupational group data.

CONFIDENTIALITY

In preparing to publish data from Census 2000, the Census Bureau became extremely concerned that with the emergence of advanced computer technology that decodes information for areas by combining extremely detailed characteristics such as occupations with small geographic units, the possibility of revealing information on individual respondents would be greatly enhanced.

In 1997 the Office of Management and Budget (OMB) rescinded Statistical Policy Directive Number 15 (1977), covering the publication and use of data covering race and ethnicity. Based on OMB's Revised Standards (1997), the Special EEO Tabulation presents data for 12 race/ethnicity groups instead of six, including several dual-race combinations, such as Black/White and Black/Asian, among others

These expanded race/ethnicity distinctions, combined with the increased ability to electronically match different data files, prompted the Census Bureau's Disclosure Review Board (DRB) to issue two rules in 2000 affecting the Census 2000 Special EEO Tabulation.

1. Any occupational category containing fewer than 10,000 people employed nationwide cannot be shown separately, and must be combined with related occupational categories to create aggregates containing 10,000 or more people.
2. Detailed occupational categories, when cross-tabulated by the 14 race/ethnicity categories, cannot be shown for any geographic area containing fewer than 50,000 people. Geographic areas containing fewer than 50,000 people must be combined in such a way that the resulting aggregation:
    a. Contains 50,000 or more people, **<u>and</u>**
    b. The subtraction of any geographic subset from a larger, combined area does not reveal information for any area containing fewer than 50,000 people.

Article 26.
VACANCIES AND JOB POSTING

26.1
All newly created or vacant existing bargaining unit positions shall be posted on the Human Resources web page for two weeks, with an electronic copy to the UCPEA office. This specifically exempts positions that may be created and filled within a single unit. An UCPEA applicant for a bargaining unit position who meets the stated minimum qualifications and identifies him/herself as a member of the unit on his/her vita shall be granted an interview.

26.2
An employee, upon request, shall be given the status of her/his application or the reason he/she was rejected for a position.

26.3
In no case shall the failure to obtain the position or a disagreement with the reasons for being rejected be grievable or arbitrable under this agreement.

Article 31**.**
JOB CLASSIFICATION
.

31.1 Classification System
a. Nothing in this Article will diminish the Board's prerogatives described in Article 3, including, but not limited to, the power to determine for the University what jobs are needed, what the content of a job description should be, or how a particular job should be structured.
b. The University will develop, in consultation with the UCPEA, an updated Classification System and Salary Schedule. The University will have at least monthly meetings with the UCPEA for this purpose. The updated Classification System will incorporate the following design criteria:

1. Seven (7) to nine (9) classification levels and corresponding pay-bands;
2. Four (4) to seven (7) classification levels designated as "Individual Contributors" and two (2) to three (3) levels designated as "Managers/Specialized Lead Contributors";
3. Updated job specifications and titles grouped into appropriate job series and families that will replace the existing UCP job specifications and payroll titles;
4. Pay-bands that are market-informed and include coherent ranges between the minimums and maximums, as well as between mid-points;
5. Maximum salaries for each pay-band; and
6. Pay-bands that are adjusted at least by the amount of the across-the-board increase each fiscal year.

c. The University, in consultation with the UCPEA, will adopt the updated Classification system in accordance with the design criteria stated above on or before January 2, 2018.
d. The University, in consultation with the UCPEA, will develop a procedure and timeline for transitioning existing employees into the updated Classification System and Salary Schedule on or before July 1, 2018.
e. A description of the Job Classification System shall be available to all employees through the Human Resources Web Page.

31.2 Career Progression
On or before July 1, 2018, the University, in consultation with the UCPEA, will develop a process by which managers can nominate employees for within-level progression, due to increased job proficiency and/or relevant professional development.

The progression will include three (3) ranks: proficient, advanced and mastery. Employees are hired at the proficient rank. The salary increase for progression from proficient to advanced is $1,000. The salary increase for progression from advanced to mastery is $1,500. These salary increases are independent of any merit awards that may be made through Article 32, Salary. Salary increases for progression will be subject to fiscal constraints, and resulting salaries will not exceed the pay-band maximum. Any denial of a request for a progression in rank shall be accompanied by a written reason for the denial. Denials shall not be arbitrary or capricious. Decisions about progression shall be final and not subject to appeal.

31.3 Reclassification Process

a. DEFINITION: A position assessment to determine whether an employee's position is appropriately classified may be requested when:

In the opinion of the employee and his/her supervisor, a majority of the job duties and responsibilities have changed to such a degree that the existing classification does not appropriately describe the work that is being done.

The method of classification analysis shall be a position assessment performed by the Department of Human Resources. It is at the University's discretion to determine the methodology for collecting position information and the protocol by which the assessment is performed.

b. No position assessment request will be considered unless the employee has been consistently performing changed duties for at least two months. An employee may not request a position assessment during his or her first year in the current position or within a year of reclassification.

When an employee identifies significant changes in his/her job duties and responsibilities, he/she shall meet with his/her supervisor and request that the position be submitted for a position assessment. If the supervisor agrees with the request, within two weeks of the initial meeting, the supervisor shall send a written request to Human

Resources asking for a position assessment to be performed. If the supervisor disagrees with the request, within two weeks of the initial meeting, the supervisor will notify the employee in writing, with a copy to Human Resources. In this case, the employee may request through the UCPEA an independent review by Human Resources. This does not preclude the initiation of a position assessment requested by a supervisor or manager without an initial request from an employee, nor does it preclude the removal of duties at any point after a classification specialist determines the changes in duties are at a higher level.

c. Human Resources shall acknowledge the request for a position assessment and forward a link to the job inventory form within one week. The job inventory form will be completed by the employee within 6 weeks of receipt. The job inventory form will then be reviewed and receipt acknowledged by the supervisory chain within 4 weeks of receipt from the employee, and returned to Human Resources. The supervisor's acknowledgement shall represent only an awareness that Human Resources is conducting an objective review of the position for the purposes of establishing the appropriate classification.

d. Following receipt of the completed job inventory form, Human Resources will complete the position assessment and provide the employee, the UCPEA, and the supervisor a written summary of the results within 12 weeks.

e. If the assessment process reveals that a different organizational level and/or job family is appropriate, and the employee meets the minimum requirements for a specific position description within that level or family, the first manager outside the bargaining unit shall authorize the change, or remove those duties identified within the assessment as being outside the classification. The effective date of reclassification shall be 60 days prior to the date the job inventory form was received in Human Resources. In instances where the duties identified as outside the classification are removed, the employee shall be compensated pursuant to Section 31.4, retroactive 60 days prior to the date the job inventory form was received in Human Resources through the date the higher-level duties are removed.

f. If the assessment process reveals that the employee's duties are not appropriately classified, and no specific position description within that level and/or job family exists, the Department of Human Resources shall consider the development of a new job family or modification to an existing one.

g. The decision of the Department of Human Resources shall be final and not subject to appeal. An employee whose reclassification request is denied may request a meeting with the Human Resources Associate who made the assessment and the Director of Human Resources, or designee, to review the reason for the denial and possibly present new evidence.

h. All time limits in this Section may be extended by mutual agreement between the UCPEA and the University.

31.4 Reclassification Salary Increases
If the position assessment results in an employee's position being reclassified to a higher level, the employee's salary may be increased by up to 10% of his/her salary on the effective date of the reclassification. The salary increase shall not be more than the maximum of the pay-band into which the employee is reclassified. Otherwise, the salary increase shall not be less than 2% of the employee's salary on the effective date of the reclassification, or the minimum of the pay-band into which the employee is reclassified, whichever is greater.

31.5 Temporary Appointments

It is within the University's discretion to appoint employees to temporary positions or temporarily assign them additional duties to cover for someone on a leave of absence, to address departmental reorganizations, to fill a need while a full recruitment effort is underway, or for other reasons the University deems appropriate. The University will make every effort to limit temporary appointments to no more than 18 months but reserves the right to exceed 18 months with approval from the Department of Human Resources for extenuating circumstances.

An employee may be compensated for a temporary appointment by up to 10% of the employee's salary on the effective date of the temporary appointment.

UCPEA Collective Bargaining Agreement between
The University of Connecticut Board of Trustees and The University of Connecticut Professional Employees Association, Local 3695 AFTCT, AFT, AFL-CIO
Effective July 1, 2016. Expiring June 30, 2021
